

Portable Compliant Isolator (P.C.I)

Monoclonal Antibody Preparation
Gene Therapy Containment
Clinical Trials

Low Cost of Ownership

Outset cost being less than 1/3 price of the price of standard isolators.
Maintenance and service costs to a minimum due to extended service intervals.
Very low running costs as the unit consumes less power than a 60W light bulb.

Ergonomic Excellence

The design of the P.C.I enables excellent visibility and height adjustability to suit any operator, allowing the safe handling of drugs and apparatus.

Space Efficient

Essential within the very busy and often very cramped pharmacies and laboratories where space is a premium.

Flexible Operation

Product or operator protection optimised at the press of a button sequence.

Mobile

Mobile sterile environment that can run on the unit's internal batteries without the need of mains power.

Licensable

P.C.I licensed for drug manufacture.
Full DQ and IQ documentation available.
